

Singh Vital Robotics (SVR) and Infinity Global Distribution (IGD) Form Strategic Joint Venture to Revolutionize Warehouse Operations

Kalamazoo, MI - June 13th, 2023 - Singh Automation (SA), a leading provider of automation solutions, and Infinity Global Distribution (IGD), a prominent player in the warehousing and distribution sector, are thrilled to announce the establishment of a strategic joint venture. The newly formed venture of SVR brings together the expertise and resources of both companies to revolutionize warehouse operations through advanced automation technology.

In response to the growing demand for efficient and cost-effective warehouse solutions, SVR aims to address this need by introducing cutting-edge automation systems specifically tailored for warehouse applications. The primary focus of the joint venture will be the development and commercialization of a revolutionary robotic system designed to automate the unloading process of floor-loaded sea containers.

By combining SA's expertise in automation engineering with IGD's deep industry connections in the retail and consumer goods sectors, SVR will provide a unique and comprehensive solution to warehouse operators seeking to optimize their operations.

"We are thrilled to join forces with IGD to bring our automation technology to the forefront of the warehousing industry," said Gurdeep Singh, spokesperson for SVR. "Our robotic unloading system has the potential to significantly enhance container throughput, reduce costs, minimize manual labor requirements, and improve safety in warehouses across various sectors. Together, we will revolutionize the way goods are handled and provide our customers with a competitive edge."

Leveraging IGD's extensive network and industry insights, the joint venture will ensure that SVR's solutions are tailored to meet the specific needs of warehouse operators. This collaboration will not only accelerate the development and deployment of the robotic unloading system but also establish a robust sales and marketing infrastructure to reach potential customers globally.

"IGD represents an exciting opportunity for us to combine our warehousing and distribution expertise with the latest automation technology," said Hardeep Singh, CEO of IGD. "We see tremendous potential

in the market for warehouse automation solutions, and this joint venture allows us to offer a comprehensive suite of advanced technology products that will transform the industry."

The establishment of SVR demonstrates the commitment of both companies to innovation and delivering unmatched value to their customers. By harnessing automation technology, the joint venture aims to drive operational excellence, increase productivity, and optimize the supply chain for warehouse operators worldwide.

About Singh Automation (SA):

SA is a leading provider of automation solutions located in Kalamazoo, MI, empowering industries to achieve increased efficiency, productivity, and safety. With a focus on cutting-edge engineering, SA develops innovative automation systems tailored to the unique needs of various sectors, including automotive, RV, medical, wood & glass processing, as well as logistics and warehousing.
